Experience

Web Designer

Ripley Entertainment | August 2018 - present

- Maintained and Managed 35 Ripley's Attractions Websites daily by making sure the sites are updated and checked to ensure they have the newest relevant content.
- Created and optimized pages in Wordpress utilizing several front-end languages to help build web pages that are viewed by thousands of users per day.
- Designed and developed Wordpress websites based on the given wireframes and brand guidelines.
- Working daily with Kace Ticketing System to complete web support tickets that ranges from bug fixes to designing new features.
- Designed digital assets for websites and for kiosk ticketing machines.
- Handled multiple projects under fast paced environments and efficiently to completion in a timely manner

Web Design Intern

Change Everything Inc | June 2018 - August 2018

- Created and optimized pages in Wordpress utilizing several front-end languages for upcoming events and promotions.
- Created and Designed an online press kit to promote the company going on television.
- Design graphics for social media ads, websites and newsletter ads for information about the events the company host.
- Handled multiple projects under fast paced environments and efficiently to completion in a timely manner

Projects

The Good Neighbor

Github Repo: <https://github.com/Northwestern-Coding-Bootcamp-Project-2/GoodNeighbor>

Deployed Project: <https://github.com/Northwestern-Coding-Bootcamp-Project-2/GoodNeighbor>

GoodNeighbor is a web app that is based solely on the idea of people helping people around their communities, based on Pyotr Kropotkin Mutual Aid. With the web app you are able to exchange services and messages via the dashboard when you create an account. This app is built with full CRUD functionality and uses MySQL for the database. The Web app is built with JavaScript, Node.js, Express, Sequelize, Express-handlebars, CSS, Bootstrap 5 along side CRUD functionality.

Domu

Github Repo: https://github.com/itskchengs/Domu_Project

Deployed Project: https://itiskchengs.github.io/Domu_Project/

Domu is a neighborhood restaurant and bar that offers house made noodles, creative takes on small plates and seasonal cocktails. I decided to take on this personal project and redesign their current site. I felt that I could give a different design spin on it, improve the user experience and a more friendly experience. The website is built with JavaScript, CSS, HTML, Bootstrap5 and GSAP

Ripley's St. Augustine

Deployed Project: <https://www.ripleys.com/staugustine>

Ripley's St. Augustine is a project that I worked on to completely redesign the whole site with a new design, new color palette and new font choices. I worked on every part of this project. From the beginning with wireframing the new layout to creating high fidelity wireframes so I can get a glimpse of how it will look. Then finally building the full website out in wordpress.

Technical Skills

Programming Languages

JavaScript (ES6), CSS3, HTML5

Frameworks & Libraries

React, Node.js, Express, jQuery, Sequelize, Bootstrap, Materialize

Database

MySQL, MongoDB

Tools & Platforms

Git, Heroku, Wordpress

Design

Adobe XD, Adobe Photoshop, Figma

Education

Full Stack Coding Bootcamp

Northwestern University

September 2021

A 24-week intensive Full-Stack Web Development program that develops the programming skills in Javascript, React.JS, Node.JS, jQuery, MySQL, Sequelize, MongoDB, Express, Handlebars.JS, CSS, Bootstrap, Materialize, HTML5
